

3) The Via Consideration with the chapel in the wood: peace - silence and wonderful panoramas

Starting point	Moso / Berghotel (1.370 m)
Difference in altitude	Ca. 430 m
Highest point	Holzer farm–Außerbacher (1.600 m)
Length of trail	Ca. 12,5 km
Time of walking	Ca. 4 hours
Difficulty	•••○○

Description of the way: from the Berghotel (1370 m) right up and then immediately left to the church of Sesto, following the path signed with number 1. Here close to the Goldenes Kreuz Gasthaus and a wooden fountain starts the Consideration way (4d-Bergweg) which takes you to the chapel in the wood. On this way you see lovely farms and coloured meadows. You will notice that the forest around the chapel in the wood is mystical and in the fascism time (between World War I and II) the inhabitants absolved secret German messes, because they were not allowed to speak their mother tongue. We follow the path to arrive at a larger path (number 4), which leads up for a short time until a crossing where we take the road on the right, signed with the number 2 to the [Waldruhe](#) (restaurant with a wonderful terrace to eat). Here we follow the road up on the left to the Holzer farm and further on to the restaurant [Panorama](#). Here the path nr. 3 leads down to Moos and way 1 brings you back to the starting point of our excursion.

As an alternative from the [Panorama](#) Restaurant you can go on to the [Helmhanghütte](#) and go back from there passing the Troyer farms.

Advices and suggestions: this easy but wonderful hike first follows the way around Sesto, passing the wonderful cemetery of Sesto and arriving at the chapel in the wood. From there it always stays at the sunny side of the valley with really nice views.
